

Announcement

11th July, 2007

New website for InformationLeader

The InformationLeader website has been redesigned to accommodate InformationLeader's growth into new markets and increasing recognition as a mature solution for regulated environments.

The new website features new case studies, discussion papers, and a new downloads section for registered users.

Existing users of InformationLeader can register for downloads and whitepapers. Electronic forms and reports will be available soon to download and import directly into InformationLeader. This will save form developers and report builders time and energy when wanting to add more to their InformationLeader implementation.

Whitepapers will also be available soon with tips on how to handle more advanced features of InformationLeader.

To become a registered user navigate to the Downloads page and simply click on the 'Register' button. Once you have submitted your details for registration there will be a short waiting period while your InformationLeader client status is verified. You will be notified by email once access to the section has been granted.

Explore the new website today to find out more about what InformationLeader can do for you!
