KR Castlemaine Chooses InformationLeader

KR Castlemaine is one of the largest manufacturers of hams, bacons, and smallgoods in Australia. With almost 200 years of experience in the Australian smallgoods industry, the company continues to focus on quality, presentation and delivering a reliability Australians can trust.

KR Castlemaine has chosen to reinforce the quality and safety of their products through InformationLeader. The entire food management system will be consolidated through a best practice Information Technology system that manages Quality, OH&S, Risk assessment and Training systems. The system will be delivered by Theta Technologies, who will also train administrators at KR Castlemaine to enable them to be self sufficient in the configuration and use of InformationLeader.
