Ecowize realizes vision through InformationLeader

Ecowize is a leading provider of specialist outsourced cleaning services in South Africa, New Zealand and Australia. Ecowize focuses on providing highly customised cleaning solutions to the food manufacturing and processing industry at competitive prices.

Ecowize has recently chosen to implement a total quality management system to realise their vision to be the preferred food safety partner in their target markets. A significant component of this plan is to introduce InformationLeader for document management and electronic record keeping across the entire organisation.

“[Ecowize has] made a bold investment in the best information management system we could find - InformationLeader” says Brett Osrin, Managing Director of Ecowize. “InformationLeader is a system that will facilitate Ecowize’s continued competitiveness in the high-compliance food industry.”
